

### NP1060

Touch POS Terminal

The Nexa NP-1060 All in One terminal is a sleek and slim, stylish terminal built for the rigors of tough POS environments.

Nexa understand that counter space is at a premium, and aesthetics are a key consideration in both retail and hospitality POS environments, which is why they have paid attention to small details, like concealing the power supply inside the stand, and using a combination of a practical matte black finish, with gloss highlights that give it a great look.

Despite an aggressive price point, the NP-1060 comes standard with a Quad Core Intel CPU and 4GB of RAM, plus 64GB of solid state storage, which is ideal for most POS environments and works well with Windows 10, as well as older versions of Windows if required.

Say no to mess!
